*The Innovative Floating Solution*

Cubi System is a modular floating system that provides a very robust and stable pontoon or floating platform for sale or hire.

Cubi is a rotationally moulded HDPE cube with a connection lug moulded onto each corner.

Each Cubi has a screw in lug on them which allows you to fill them with water to adjust the air draft of your pontoon or taper a pontoon into the water.

Cubi are quick and easy to assemble or reconfigure making them ideal for both long or short term requirements, they don't require any maintenance, are resistant to acids and hydrocarbons and are 100% rot proof.

SE01 Cubi Module

SE02 Connection Lug

The Cubi are connected using an anti ejection 'connection lug' and have the edge connectors bolted together using a 'side connection bolt'.

This installation system is quick and easy yet provides a very robust and stable pontoon.

SE06 Side Connection Bolt

We have a range of accessories to enable you to create a pontoon of your exact specification.

SE04 Cleat

SE40PE Hand Rail Post

SE05 Fender

SE201 Bathing Ladder

As the 'Sole UK Distributors' of Cubi system we hold a large stock of all Cubi System products available for immediate delivery.

We can also manufacture 'custom products' for your Cubi system pontoon should you require them. All Cubi System products are available for both sales and long and short term hire.
